

ROCKET FUND

Welcome Guide

Rocket Fund is a crowdfunding platform for schools.

We empower teachers to try new technology, by helping them fundraise from businesses and their community.

What can you fundraise for?

You can fundraise for any tech product / service you think will benefit your students.

Previous projects have raised for: Virtual Reality headsets, 3D printers and drones.

For more inspiration, check out this video: [Donna's Story](#)

How does Rocket Fund work?

1. Choose what tech you want to try and create a pitch
2. Launch your campaign by sharing with your school's contacts and local community
3. Hit your target, then we collect the money & transfer to your school bank account
4. Buy the products you wanted, then send thanks to your donors and write a review to help other teachers in the future

The Benefits

- ★ We are completely free to use
- ★ We support you throughout the process
- ★ We enable donations from £1 to £1,000 and beyond!

About us

Rocket Fund was created by Nesta, the UK's innovation foundation.

We're on a mission to enhance education for all, by enabling all students to access the latest technology and finding out what works.
